### **DETAILED ACTION**

1. The amendment filed September 13, 2004 has been entered.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 2 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Gagliano (US 5,039,256).

Gagliano discloses pinned foundation system comprising a form means (1) configured to receive a cementitious material in a fluid form for subsequent curing (col.4, lines 6-21), the form means having an upper and a lower sections with circular holes (4, 5) therein, the upper section being configured to contain the lower portion of the cementitious material, the form means being dimensioned so that the cementitious material, after it has cured, is shaped on a lower portion (see Figs. 1-5; col.3, lines 51-68; col.4, lines 1-63).

Although Gagliano'256 is silent with respect to the cleavage of the soil heave, it is believed to be inherent that such a structure of Gagliano'256's device provide the protection of

Application/Control Number: 10/633,155

Art Unit: 3673

soil heaving after it is installed in the ground.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 2-7, 11, 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Gagliano (US 6,578,333).

Gagliano discloses an integrated precast footings comprising a form means (1i, 1ii) configured to receive a cementitious material in a fluid form for subsequent curing, the form means having an upper and a lower sections with circular holes on a plurality of vertical sides including a first and second circular holes to the vertical sides respectively (see Fig. 1), the form means having a removable cap (3a) the upper section being configured to contain the lower portion of the cementitious material, the form means being dimensioned so that the cementitious material, after it has cured, is shaped on a lower portion (see Figs. 1-3; col.4, lines 6-67; col.5, lines 1-51).

# Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/633,155 Page 4

Art Unit: 3673

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103<sup>®</sup> and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 8, 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gagliano'256 or Gagliano'333. The teachings of Gagliano'256 and '333 have been discussed above.

Although Gagliano'256 or '333 fails to disclose or fairly suggest an anchor bolt, a casting base with an anchor bolt and corrugated steel fibers being added to the cementitious material, it would have been obvious to one of the ordinary skill in the art at the time the invention was made to modify the system by providing such a conventional form elements, i.e., a casting base with the anchor bolt and by adding steel fibers, such as super-plasticizer, to the form and cementitious material in order to effectively perform the curing process with reinforced cementitious material therewithin.

## Allowable Subject Matter

8. Claims 17-21 would be allowable over the prior art of record.

9. Claims 9, 10 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jong-Suk (James) Lee whose telephone number is (703) 308-6777. The examiner can normally be reached on 6:30 am to 3:00 pm, Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather C. Shackelford, can be reached on (703) 308-2978. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
